**FOAMING RESIN SHEET COATING STRUCTURE, DEVICE AND
METHOD**

Representative drawing

(57) Abstract:

PURPOSE: A foaming resin sheet coating device is provided to coat the surface of the foaming resin with a film for blocking the eruption of

harmful material which is possible to erupt in a container made by processing a PS foaming resin as a wrapping use.

CONSTITUTION: The foaming resin sheet coating device is comprised of: a foaming sheet supplying roller for supplying the foaming sheet in a hardened state; an adhering resin compressor(17) for spreading an adhering resin on the surface of the foaming resin passed through the supplying roller; a PP film supplying roller for supplying the PP film to the upper part of the adhering resin; and a sizing drum for transmitting while dropping a temperature for hardening the PP film in a state of adhering the PP film to the foaming resin.
